

Scenario 1

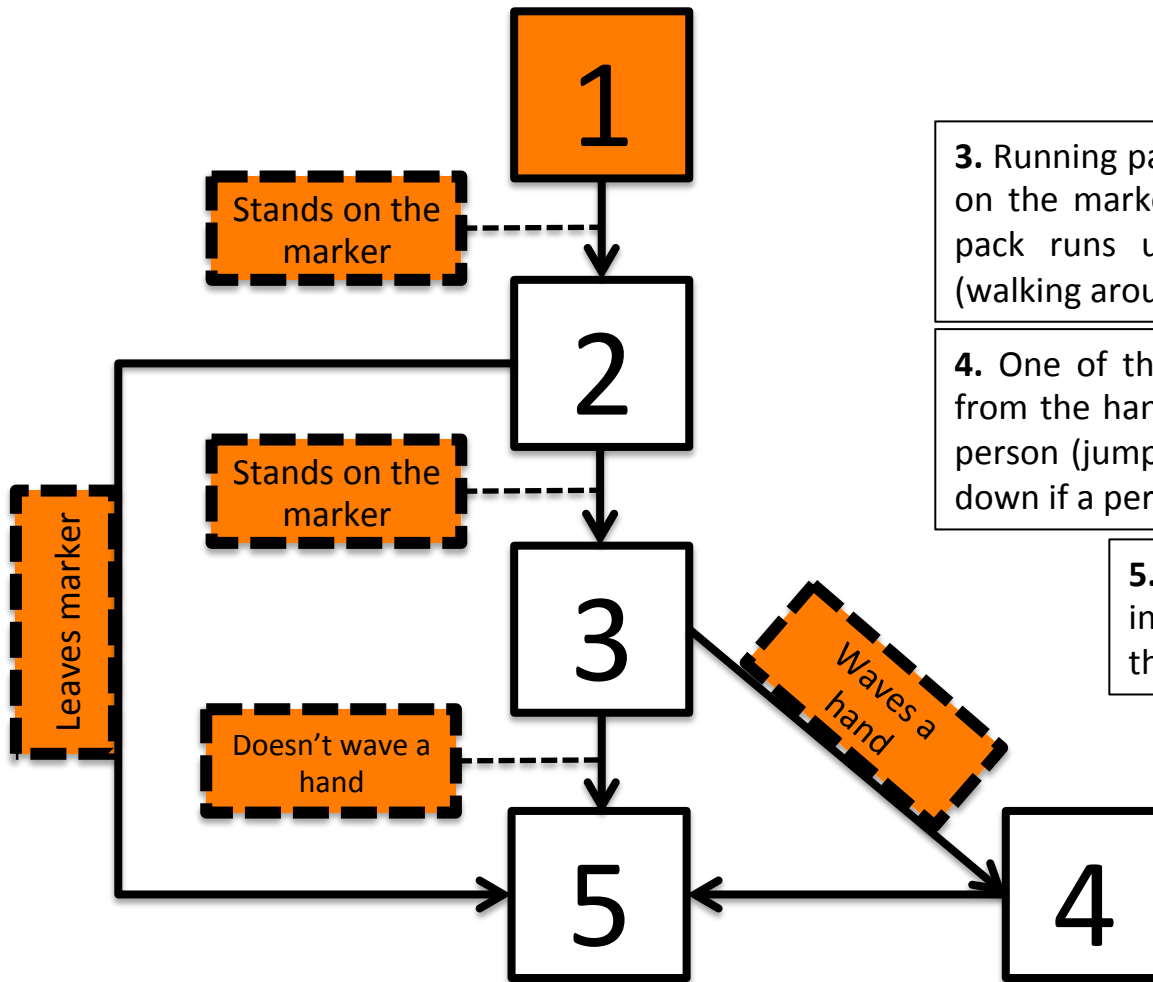

1. A person stands on the marker

2. A flock of small dinosaurs (raptors) is running out from the edge of the screen

3. Running past the marker, one of them notices a person on the marker, makes a noise to the others, the whole pack runs up to the person, begins inspecting him (walking around, sniffing, occasionally jumping)

4. One of the dinosaurs comes closer and starts to eat from the hand of the person, he follows the hand of the person (jumps up when person raises his hand high, gets down if a person puts his hand to the floor)

5. After 20 seconds of "feeding" the flock loses interest to the person and disappears from the opposite side of the screen

actions of person

character reaction

Scenario 1 (a)

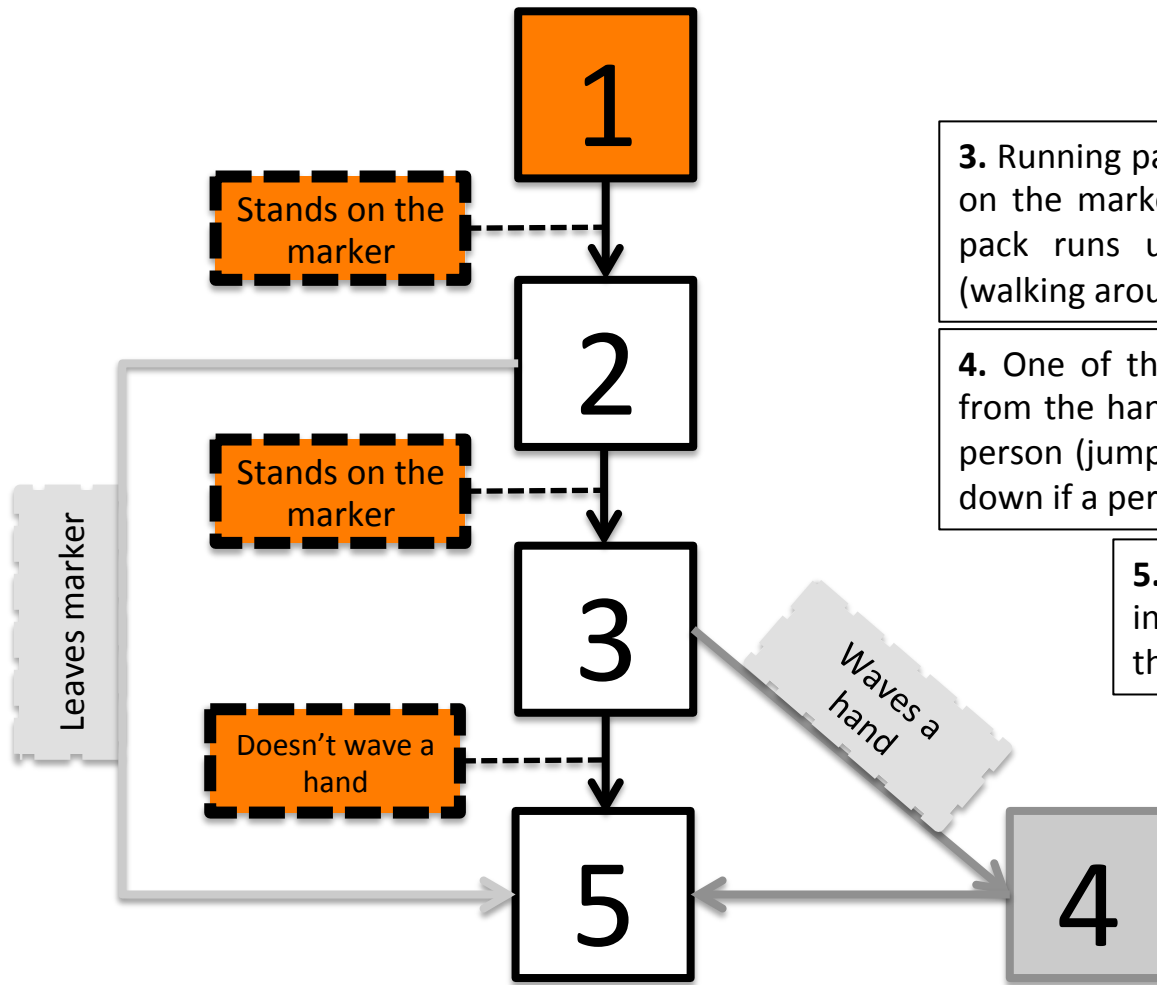

1. A person stands on the marker

2. A flock of small dinosaurs (raptors) is running out from the edge of the screen

3. Running past the marker, one of them notices a person on the marker, makes a noise to the others, the whole pack runs up to the person, begins inspecting him (walking around, sniffing, occasionally jumping)

4. One of the dinosaurs comes closer and starts to eat from the hand of the person, he follows the hand of the person (jumps up when person raises his hand high, gets down if a person puts his hand to the floor)

5. After 20 seconds of "feeding" the flock loses interest to the person and disappears from the opposite side of the screen

- character reaction

Scenario 1(c)

1. A person stands on the marker

2. A flock of small dinosaurs (raptors) is running out from the edge of the screen

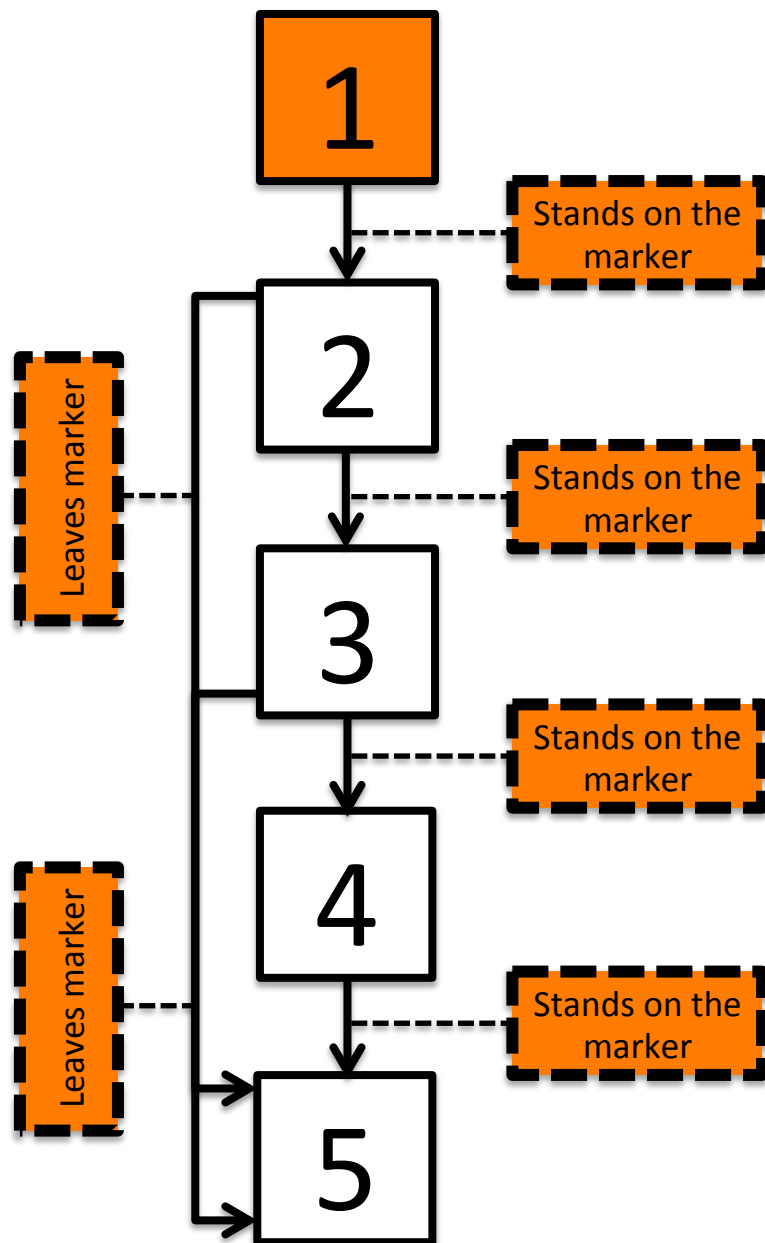

3. Running past the marker, one of them notices a person on the marker, makes a noise to the others, the whole pack runs up to the person, begins inspecting him (walking around, sniffing, occasionally jumping)

4. One of the dinosaurs comes closer and starts to eat from the hand of the person, he follows the hand of the person (jumps up when person raises his hand high, gets down if a person puts his hand to the floor)

5. After 20 seconds of "feeding" the flock loses interest to the person and disappears from the opposite side of the screen

actions of person
character reaction

Scenario 2

1. A person stands on a marker

2. Two medium-sized dinosaurs coming out from different edges of the screen. They mention each other, start being aggressive, growl at each other, start fighting (optional)

3. They hear a loud roar, the dinosaurs are frightened, fleeing to one side of the screen. A few moments later from the other edge of the screen appears tyrannosaurus, stops at the center of the screen, roars

4. Notices a person on the marker, sniffs him, and runs after the two smaller dinosaurs

5. If a person comes out off the marker before the end of the script, tyrannosaurus immediately runs for two smaller dinosaurs

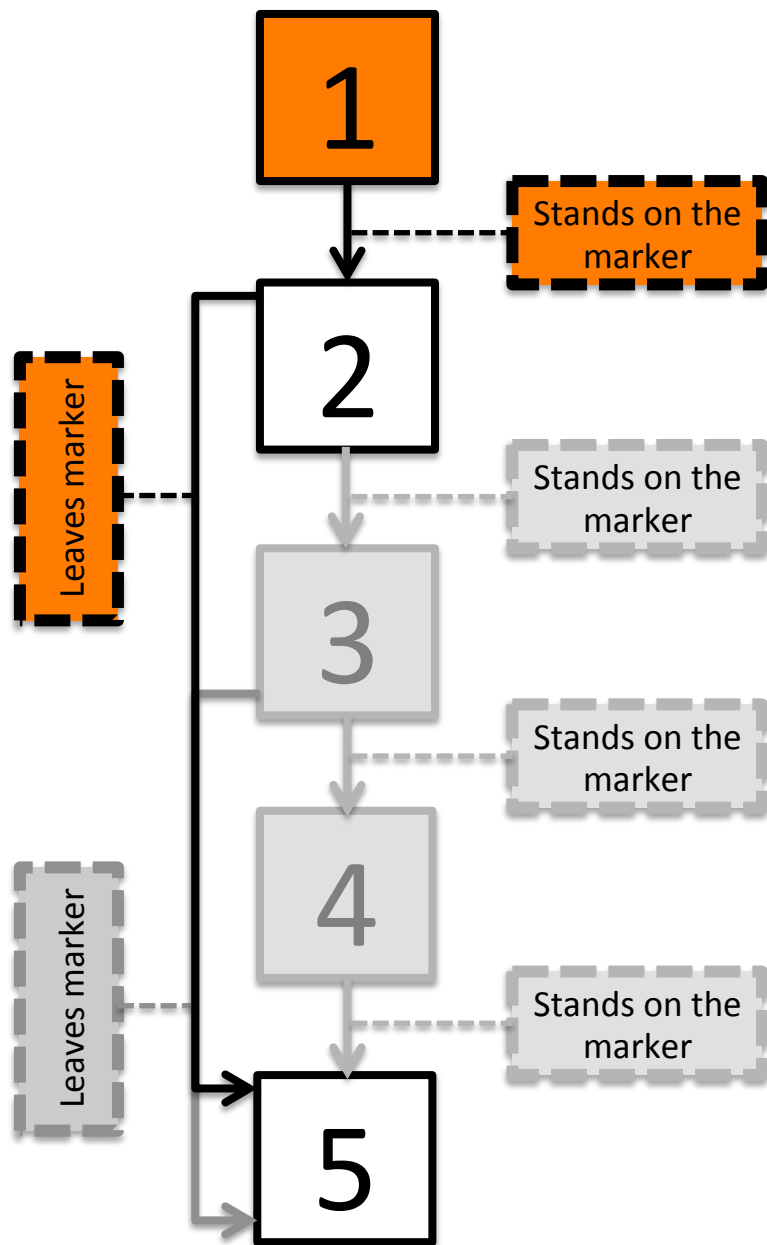

actions of person

character reaction

Scenario 2(a)

1. A person stands on a marker

2. Two medium-sized dinosaurs coming out from different edges of the screen. They mention each other, start being aggressive, growl at each other, start fighting (optional)

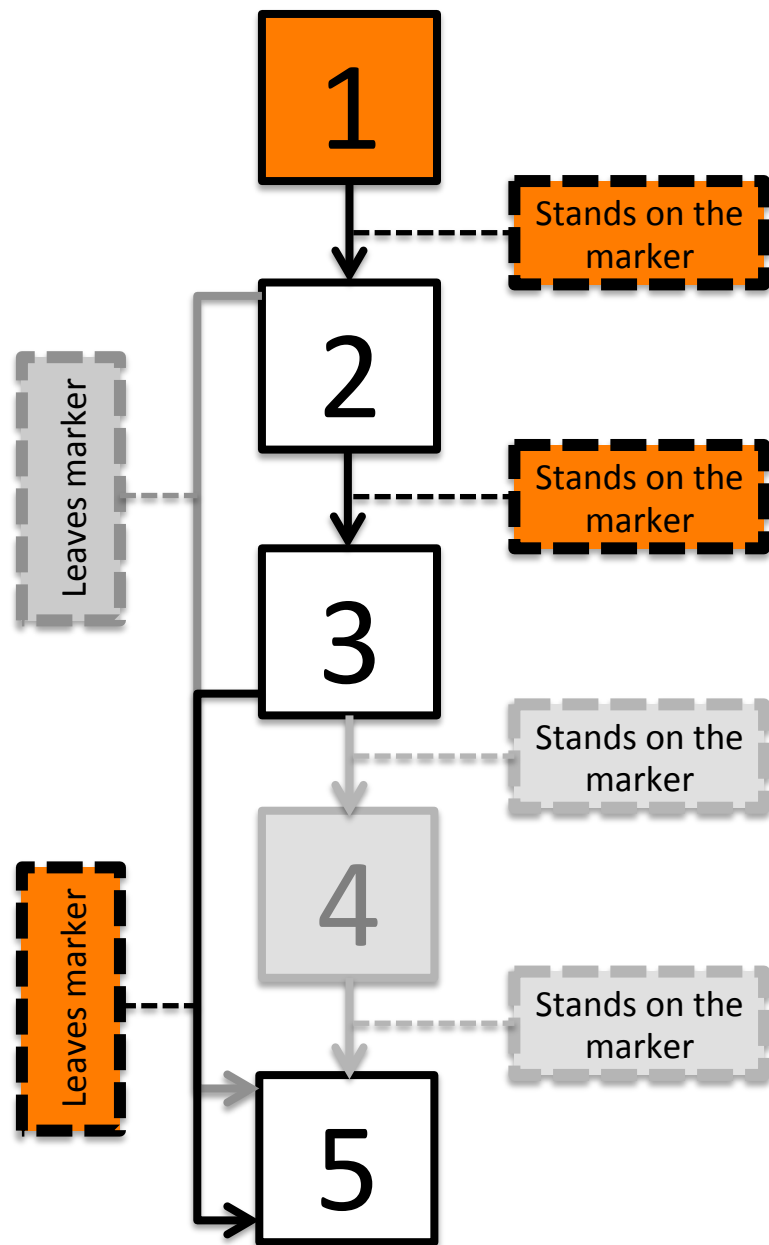

3. They hear a loud roar, the dinosaurs are frightened, fleeing to one side of the screen. A few moments later from the other edge of the screen appears tyrannosaurus, stops at the center of the screen, roars

4. Notices a person on the marker, sniffs him, and runs after the two smaller dinosaurs

5. If a person comes out off the marker before the end of the script, tyrannosaurus immediately runs for two smaller dinosaurs
